Education

GLA University

Bachelor of Technology in Computer Science (8.39 / 10)

Sep. 2022 – May 2026

Mathura, UP

Technical Skills

- **Languages:** Java, JavaScript, C++
- **Software Engineering Fundamentals:** Data Structures, Algorithms, Object-Oriented Programming (OOP)
- **Full-Stack Development:** HTML5, CSS3, React.js, Node.js, Express.js, MongoDB, Enact
- **Tools and Platforms:** Git, GitHub, Gerrit, VS Code

Internship

LG Soft India

Research Engineer Intern

July 2025 – Present

Bangalore, Karnataka

- Worked on a **webOS-based TV application** built using the **Enact framework(React-based)**, focusing on analyzing, debugging, and resolving complex issues to ensure stable functionality and a seamless user experience.
- Implemented UI features directly from **Figma designs**, optimizing design-to-code accuracy while improving application efficiency, performance, and responsiveness.
- Optimized application workflows and performance through systematic refactoring and enhancements, contributing to improved reliability and user engagement.
- Utilized **Git and Gerrit** extensively for version control, enabling efficient branching strategies, structured code reviews, patch management, and collaborative development in an agile environment.

Projects

TV Photobooth | *Enact, React, Luna API, Javascript*

October 2025

- Developed the **TV Photobooth** application from scratch using the **Enact Framework (React-based)**, implementing responsive UI screens based on Figma designs and ensuring a seamless user experience on TV platforms.
- Implemented core features including **photo capture, photo frame customization, wallpaper setting, and photo storage**, integrating Luna Service APIs to communicate with platform services.
- Designed and developed a **stack-based navigation system** to manage screen history and enable efficient back-navigation across complex user flows.
- Collaborated with cross-functional teams to integrate external services and support features such as **photo printing workflows for Photoism stores**, contributing to the end-to-end application functionality.

BudgetBuddy | *Node.js, Express, MongoDB, React*

August 2024

- Built a personal expense tracker with real-time data updates, making it easy to manage and analyze financial records.
- Designed budgeting tools with transaction categorization, helping users track expenses easily, and improved the app's interface with data visualizations to enhance user engagement.
- Built a strong database structure that securely connects user profiles with their transaction history, ensuring safe storage and quick access to financial data.
- Implemented Enabled real-time updates between the frontend and backend, ensuring instant changes to user profiles and financial records for a smooth experience.
- **Live Demo:** <https://budget-buddy-frontend-6hrm.vercel.app/>

Achievements

- Solved more than **1000** LeetCode questions.
- Earned the **Knight badge** on LeetCode with a current rating of **1900+**.
- Scored **89/100** in LG Soft India Pre-Final 1, **97/100** in Pre-Final 2 and **82/100** in Final Intern LSET (DSA).
